

*Small changes lead to big savings*  
**with the Peak Power Savers<sup>®</sup>  
Smart Thermostat Program**

A smart thermostat can save you  
an average of \$50 annually on energy costs.<sup>1</sup>

It'll find the best times to cool or heat your  
home – saving you energy and money.

## Here's how it works:

- The Smart Thermostat Program syncs to your thermostat to learn the settings that keep you comfortable.
- Occasionally, on days when energy use is high, we'll schedule an Energy Savings Event (no more than 14 days in the summer and 10 in the winter).
- Our smart technology will adjust your thermostat by a few degrees to pre-cool or pre-heat your home using your comfort preferences. This helps you stay comfortable before, during and after the event while conserving energy when demand for energy is high.
- And you'll always maintain control. You can adjust your thermostat settings at any time if your home becomes uncomfortable.

[1] Source: www.energystar.gov. Savings may be greater depending on climate, personal comfort preferences, occupancy, and/or heating/cooling (HVAC) equipment. [2] Total available rebates depend upon service type received. Residential customers only. Must have eligible heating and cooling equipment. Customers will receive the incentive Prepaid Mastercard in the mail within 2-4 weeks after enrollment.

## Need a smart thermostat?

Enroll and purchase a new thermostat for as low as \$0. Plus, for a limited time, get a \$25 Prepaid Mastercard when you enroll AND at the end of each season you participate.<sup>2</sup>

[Visit ConsumersEnergy.com/ourtownthermostats](https://www.consumersenergy.com/ourtownthermostats) to claim your thermostat.

## Already own a smart thermostat?

Enroll your thermostat to get a \$80 Consumers Energy Prepaid Mastercard<sup>®</sup> when you enroll, plus another \$25 Prepaid Mastercard at the end of each season you participate.<sup>2</sup>

[Visit ConsumersEnergy.com/eventbyo](https://www.consumersenergy.com/eventbyo) to enroll your thermostat.
